SUMMARY

Software Engineer with 1+ year of experience at Cognizant building **full-stack** and **backend** systems with **Java**, **Spring Boot**, **ReactJS**, and **SQL**. Strong foundation in **Data Structures**, **Algorithms**, **OOP**, and **DBMS**, with hands-on experience in **REST API** design, **SQL optimization**, **root-cause analysis**, and **Agile** delivery. Seeking an **SDE** role to build scalable, production-grade software.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, SQL
- **Backend:** Spring Boot, Spring Data JPA, Spring Security, OAuth, REST APIs, Flyway, Microservices
- **Frontend:** ReactJS, HTML, CSS, Vite
- **Databases:** MySQL, H2, PL/SQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Design, DBMS
- **Tools:** Git, GitHub, Maven, Docker, Postman, Codex, Claude Code

EXPERIENCE

Cognizant Technology Solutions June 2025 – Present
Programmer Analyst (Full-Stack / Backend) *India*

- Used **Codex** to turn user stories into **production-ready code** and to assist with **code reviews**, **unit tests**, **Git** operations, and **debugging**, reducing manual development effort and feature delivery time.
- Debugged and resolved **production defects** through systematic **root-cause analysis**, improving application reliability and reducing recurring incidents.
- Optimized **SQL queries**, joins, subqueries, and views for internal reporting, reducing report generation time.
- Built front-end enhancements and fixed UI bugs in internal tools using **JavaScript** and **ReactJS**, improving usability.
- Worked with cross-functional **Agile** teams across multiple sprints to analyze requirements, design **backend solutions**, and maintain end-to-end **traceability** between requirements, code, and test cases.
- Delivered solutions in **two internal Cognizant hackathons** under tight timelines, collaborating with cross-team members.

PROJECTS

BookLoop | *Java, Spring Boot, MySQL, React, TypeScript* GitHub

- Built a **full-stack** peer-to-peer platform for sharing, exchanging, and selling books using **Codex**, with a **Spring Boot** REST API backend and a **React** + **TypeScript** (Vite) frontend.
- Implemented verified member accounts, profile management, book listings, and search, with **Spring Security** for authentication and **Flyway** for versioned **MySQL** schema migrations.
- Developed exchange requests with **chat**, sale-interest and sold workflows, and owner-reviewed free-book claims with private chat and handover completion.
- Added **OCR-assisted** sale-bill price checks and documented architecture, API details, and product requirements in the repository.

Department Portal | *Java, Spring Boot, ReactJS, SQL, REST APIs*

- Built a **full-stack** portal for managing academic resources for students and faculty, connecting a **ReactJS** client to **Spring Boot** backend modules through **RESTful APIs**.
- Implemented **role-based views** and interactive UI components, cutting manual record-keeping effort.

Spring Boot E-Commerce Backend | *Java, Spring Boot, Spring Data JPA, Spring Security, MySQL*

- Developed a layered (**Controller–Service–Repository**) backend with full **CRUD** REST endpoints and multipart image upload.
- Applied **global exception handling** and request validation, and tested endpoints in **Postman**, reducing invalid request errors.

EDUCATION

RMK College of Engineering and Technology 2021 – 2025
B.E., Computer Science and Engineering CGPA: **8.34**

ACHIEVEMENTS

- Participated in two internal Cognizant hackathons; **ranked among the top teams** in the college hackathon.
- Event Organizer for the college technical symposium, coordinating participants.
